

Easi-Nav Navigator

Easi-Navigator GPS Receiver

The Easi-Nav can turn any laptop into an in-car navigator. Simply plug the unit into your laptop via the supplied USB cable and using off-the-shelf software, you can find your customer, holiday destination, or even the way home. Small in size and easy on your pocket, this product is the ideal way to sample GPS without sacrificing accuracy or sensitivity.

This unit has the ability to track down to **-185dBW** — meaning it can be simply placed on the dashboard of a car to receive signals. Plus, you can track even

while navigating through areas of heavy coverage such as forests or urban canyons.
